Vicar Broadcasts

On Great Authors

Father John Clarence Petrie, vicar of the Episcopal church at Belle Glade and Cleveland, believes the church must do more than condemn indecent literature. It should point out that the cheap trips now being foisted on the public as realism is actually much less interesting than the great books which are recognized as world classics.

Hence he is taking his radio time next week on WSWN Belle Glade to give a series of talks at 10:45 A. M. Mon. thru Friday, on "Great Books: Great Thoughts".

His topics will be: Mon. "Choose the Best", Tue. "Emerson: New England Sage", Wed. "Wendell: English Jew", Thu. "Dostoevsky: Soul Prober", Fri. "Tolstoy: Champion of Reason".

Church of Christ Scientist

Man's God-given safety and protection will be emphasized at Christian Science service Sunday in the Lesson-Sermon "God the Preserver of Man".

The Apostle Paul's healing of Eucharis, the young man who "fell down from the third floor and was taken up dead" (Acts 20), will be included in the Scriptural readings.

Selections from "Science and Health with Key to the Scriptures" by Mary Baker Eddy will be read, and the one Mind, in order to change the notion of chance to the proper sense of God's unerring direction and thus bring out harmony.

The Golden Text is from Psalms (121:7): "The Lord shall preserve thee from all evil: The Lord shall preserve thy going out and thy coming in from this time forth, and even forevermore."

(Meditation) Read Psalm 84
I was glad when they said unto me, Let us go into the house of the Lord. (Psalm 122:1)

Our Sunday school superintendent asked, "Will you take a class of Junior girls?" At first I hesitated and then suggested that someone else might make a better teacher. "But I am asking you," he answered.

Through his request the church spoke to me. I realized I had a responsibility and so began working in the church school. I love the church because there is an opportunity to lead young people into the Christian life. I love the church also because we have talent or many, there is always need for people in church. The influence of a dedicated worker cannot be measured and it goes on forever.

We meet God in the church, and in its fellowship we meet people and make wonderful friendships to brighten life and challenge us to live at our best.

PRAYER: Our heavenly Father, we thank Thee for Thy Church and for all the help it has given us through the years. May we serve it faithfully to the best of our ability and win others as members. Give us patience and understanding with our fellow workers. Bless all churches everywhere and grant that we may be true to our mission; through Jesus Christ our Lord. Amen.

Today, as I have opportunity, I will speak a good word for the Church.

Everybody Knew About Wrigley's Gum

How to Have a Going-Out-Of-Business Sale
A NUMBER of years ago, William Wrigley, the chewing-gum maker and ball-cub owner, decided that everyone in America knew about his gum and that there was no further need to advertise it.

So he quit advertising. As well known as his gum was—when he was advertising it—it was quickly forgotten by millions of people. Other gums were being advertised, so people bought them.

Mr. Wrigley got on the stick at once, put his advertising back to work, and saved his business. His son still has it—and profits enough to keep his ball club going.

Wrigley never made the mistake, however, of thinking his advertising was a "favor" to the newspapers, magazines, and other media in which he placed it. He was the business of making sales, not extending favors. Yet this is an error often made by some retail merchants. They feel that everyone knows they are in business, and their advertising is only a favor to the newspaper.

Actually it is no favor at all—any more than it is a favor when customers buy what advertisers have to sell.

ANY TALK, however, of who gets favored more, covers up a much more vital fact. The absence of vigorous, continuous advertising does much to drive people to go off somewhere else to shop as the siren lures of distant merchants.

Advertising—thought-out, advertising—news, and people look for such news where they can find it. Trade always goes to the active merchandiser and the consistent advertiser of genuine values. No "favors" are involved.

THE MERCHANT who thinks everyone knows him too often gets around to advertising only when he has a going-out-of-business sale. It has happened many times.

Blight Study

Woman Plant Pathologist Completes Study Of Field Corn Varieties Here

Miss Alice L. Robert, plant pathologist with the USDA Plant Industry Station, Beltsville, Maryland, has returned to this city after completing a three-week study of field corn at Everglades Experiment Station.

Miss Robert (it's pronounced "Roh-are") a veteran of about 20 years as a pathologist, has been an annual visitor to the Glades for the past four years. She is studying leaf blight here to develop lines of corn which can be used in the development of resistant lines of hybrid corn.

One of the few women pathologists in the United States, Miss Robert has been working with corn varieties since 1946. While the field corn hybrids developed from her studies may not necessarily be grown in Florida, it is necessary to investigate samplings taken on the approximately 25 acres at the station.

Principal hope of these studies is to develop varieties which show blight resistant characteristics earlier than most since the development of a suitable hybrid takes six to ten years, she said.

Data taken by Miss Robert will be sent to Iowa State University for analysis to determine the blight lines which can be used as a source of resistance in breeding. Work of the past three years has already been analyzed and will soon appear as a technical paper in the Agronomy Journal.

The lady pathologist received her master's degree in plant pathology from Louisiana State University. As to why a woman would enter a field in which men are in the majority, Miss Robert said she had always liked science and math, "particularly an accurate science," as she put it.

Much of the lady pathologist's work is done in association with Dr. W. J. Wisner, research agronomist with USDA who joined the Belle Glade staff last year. His work has been primarily as a corn breeder.

Miss Robert's work in field corn parallels the work of Glenn Smith, frequent Glades visitor from Indiana, who deals with sweet corn.

Miss Robert in closing the interview, complimented the Glades growers by saying that she had observed that farmers in the area always seemed vitally interested and willing to find something that will help the crops while other area farmers often appear reluctant to try new methods of development.

MIKE SIDE
With AL HARRIS
WSWN Program Director

Some people refer to country music as music that's sung by car through the nose for money. I guess that's true to a certain extent; however, the same could be said about any class of music depending on your particular tastes.

Last year country music hit an all-time high in popularity. Tunes like "Young Love," "Gone With A Blue Bird," and "Bye Bye Love" remained on the national hit parades for many weeks. There are those who would say that those were not country tunes. Nevertheless, the fact remains, those tunes were recorded by people who make their living recording and appearing as country artists.

I suppose there is a line between hillbilly and country music, but why draw the line when you can please the solid country music fan and the newer country music fans with a mixture of the old and new style country music?

Here at WSWN we try to reach as many people as possible by varying our schedule to include rock and roll, country, western and hillbilly, gospel and the top 10 tunes.

There's no other station in south Florida so my knowledge, with such a varied musical schedule. We feel that this type of programming will prove profitable to our advertisers and, at the same time, give the listeners what they want to hear. Of course, country music is the big item here at the family station because there's thousands of people in this area who love it.

If country music is corn ... then there's money in that corn field. It's been here a long time ... it's here to stay! Next week: Weather forecasting.

At the June 6 game were Mr. and Mrs. D. L. Shiver, Mrs. Guy Wilson, Mrs. Ray Wilkinson, and daughter, Patty.

Belle Glade Council

(Continued from Page One)

since Jan. 26, 1955 when he began at a \$6,000 annual salary. The position now pays \$7,800. Robinson was interviewed in December, 1954 shortly after the ouster of former manager Tom Carle.

Carle survived little more than a year before the council asked him to resign "for the good of the city" but with no official charge.

Commissioners Ingram and Ashley served on that council but voted to retain Carle. At that time the city manager served "at the pleasure of the commission."

Robinson has been under contract for the past two years before the adoption of the new city charter which provides for a hearing for the manager before the commission can vote to remove him.

Prior to the Belle Glade appointment Robinson served six years as city manager at Fairfield, Maine and had over 23 years experience in other city posts.

Sewer Bids

Apparent low bidders for three sections of the sewer system were B. A. Roemer Construction Co., treatment plant \$289,912; Marbough Construction Co., Ft. Lauderdale, mains \$483,151.67; Cone Construction Co., Tampa, lift stations \$94,000 for a total of \$787,241.67.

The engineers' estimate was \$829,000 with the government grant paying \$130,000 of that figure. Alternate bids and certain other reductions attached to the bids could bring the actual construction price much lower, it was stated.

Without further action the council voted to turn the bids over to Russell & Axon for study and recommendations.

Fiscal representative R. C. Hodge told the council at the close of the meeting that nothing should be done until the engineers make their report, but that the city should issue \$250,000 more bonds without changing their rate schedules recently adopted.

Local Action

The council agreed to seek tri-city cooperation with South Bay and Pahokee to acquire a station wagon to transport children of the Glades to county clinics at West Palm Beach.

A Belle Glade Rotary delegation presented the recommendations and said that civic organizations in the three cities would probably donate much of the cost.

The Council also: Tabled recommended changes in the house trailer ordinance presented by the planning board.

Passed an ordinance on second reading creating loading zones on NW 3rd and 4th Streets.

Ordered a building at 237 S W 5th St. condemn upon the building inspector's recommendation.

Granted a request from Moore Haven and Pahokee Negro recreation officials to use Lake Shore pool once a week during their summer program.

Mrs. Harilee Appointed Ladies FFVA Chairman By Roy Vandergriff, Jr.

Mrs. J. P. Harilee, Jr., Pameto, has been appointed Chairman of Ladies' Activities for the 15th Annual Convention of the Florida Fruit & Vegetable Association in Miami Beach, September 24, 25 and 26.

Mrs. Harilee, wife of the association director who leads the upcoming conference was named by FFVA President Roy Vandergriff, Jr. Pahokee.

The terrific job of mapping out events for a one-day \$8000 has been handled by Mrs. Harilee once before—at last year's annual meeting.

It was in 1957 that the ladies were taken on a boat cruise and shopping tour, treated to bridge, cabana and "bingo" parties, attended the premiere of "Around the World in 30 Days," and were guests at a tea and charm school at the fabulous Hotel Fontainebleau.

Luncheons and breakfasts plus the annual banquet which features entertainment and nationally known speakers, rounded out the three-day program.

Just as exciting will be the fare this year Mrs. Harilee promises.

The Fontainebleau is once again the convention site.

ARE HIGH PRICES STRANGLING THE PAINT INDUSTRY?

A STORY OF ONE OF AMERICA'S HUGE BUSINESSES

In the inflationary trend of paint prices necessary? Not based on material cost versus sales price! According to the U. S. Department of Labor, paint prices increased 18 times as much as the material used in making it from September, 1947-1957. Linseed and soy oils, primary paint ingredients, are actually down .64% and 39%!

Is labor responsible? No! Automation and new equipment advances make it possible to achieve even lower unit production cost than in 1947, even with increased hourly wages! . . . My company eliminates or reduces 18 profits and costs that amount to more than the cost of the paint itself. Then I share all these savings with my huge family of friends!

Yes, as any branch of mine I give you a few cans of fine paint with every one you buy - gallons or quart - at no extra charge. NOW please
